PRODUCT DESCRIPTION

Modern light source THAR LED has a shape of a bulb, equipped with SMD LED diodes, which guarantee high energy efficiency and are characterized by a long service life. This product works with a power of 12 W and has a light output of 1,480 lm. It shines with a natural white color, with a temperature of 4000K. Our LED bulb has a built-in PIR motion sensor, which is responsible for controlling the light source after motion is detected in the detection area and with a reduced light intensity <20lux. The motion detection range is up to 6m. Lighting time after motion detection: about 60 sec. The bulb has an E27 holder and does not require any installation. It
