UWG18-xx 18 mm Wave Guide Accessory

Datasheet

Ultrasonic Wave Guide for Sensors with 18 mm Threaded Barrel

- Attaches to the threaded barrel of Banner S18U or QS18U ultrasonic sensors
- Focuses the ultrasonic sensing beam to access and detect the depth of small openings
- Choice of two sizes: 5.0 mm or 6.4 mm barrel inside diameter
- Excellent for sensing small objects or for detecting edges on sheet metal
- Construction: Acetal

Models

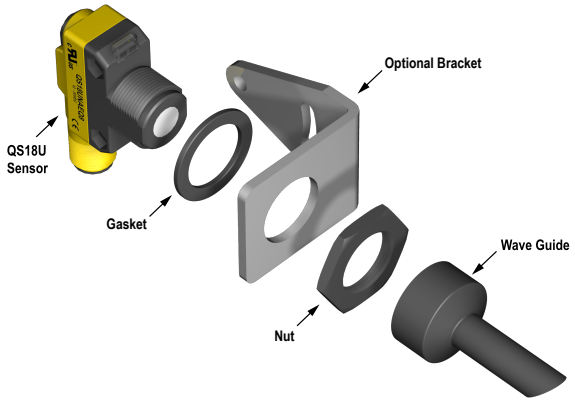

Model	Description
UWG18-5.0	5.0 mm inside diameter barrel
UWG18-6.4	6.4 mm inside diameter barrel

Installation

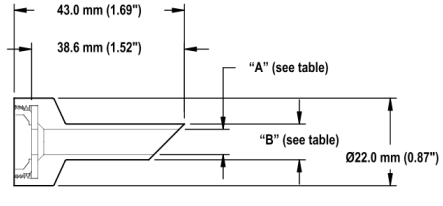

A slender threaded plastic nut is included with the accessory. For sensors that will be barrel-mounted, use this nut for mounting the sensor, then mount the wave guide as described.

NOTE: For high-vibration applications, application of a small amount of thread-locking material is recommended.

1. Thread the wave guide accessory onto the 18 mm barrel of the sensor until the wave guide is snug (the sensor face is in contact with the gasket).
2. Continue to tighten wave guide until the bevel faces downward. This helps prevent the collection of debris inside the opening.

Dimensions

	Model	Inside Diameter (“A”)	Outside Diameter (“B”)
