Technical description

The differential pressure switch GGW...A4 is an adjustable gas-differential pressure switch as per EN 1854 for automatic burner controls. It is suitable for switching a circuit on, off or over on changes in actual pressure value relative to the set reference value. The reference value (switching point) is adjusted on a setting wheel provided with a scale. The test nipple is integrated in metal housing as standard.

Applications

Differential pressure switch in furnace, ventilation, and air conditioning applications. Differential pressure switch: Suitable for employment with gas family 1, 2, 3, and other, neutral, gaseous media as well as air, smoke and exhaust gases. It does not contain any

non-ferrous metals, suitable for gases of up to max. 0.1 vol % H₂S, dry.

Certifications

EC type testing certificate as per:

- EC-Gas Appliances Regulation
- EC-Pressure Equipment Directive

Pressure switches class "S" as per EN 1854.

Approvals in other important gas-consuming countries.

Function

Differential pressure switch operating in the over- and under-pressure ranges. The differential pressure acts on the membrane, pressing it against the force of the adjusting spring and against the microswitch. The pressure switch operates without outside power.

**Differential pressure switch
GGW...A4 and GGW...A4-U**

The switching apparatus reacts to the difference in pressure between the two pressure chambers [G 1/4 (+) <-> G 1/8 (-)] and, if the pressure exceeds or drops below the setpoint, activates or switches an electrical circuit.

Unit selection

If the lower pressure is [G 1/8 (-)] and excess pressure with respect to the atmosphere exists type GGW...A4 must be employed.
If the lower pressure is [G 1/8 (-)], and lower pressure with respect to the atmosphere exists type GGW...A4-U must be employed.

**Overpressure switch GGW...A4
Pressure connection G 1/4 (+)**

Single-acting pressure switch in the over-pressure range.
The switching mechanism responds if there is an overpressure which switches on, off or over to an electric circuit if the set reference value is exceeded or undershot.

The pressure connection G 1/8 may not be closed.

**Low pressure switch GGW...A4-U
Pressure connection G 1/8**

Single-acting pressure switch in the over-pressure range.
The switching mechanism responds if there is a low pressure which switches on, off or over to an electric circuit if the set reference value is exceeded or undershot.
The pressure connection G 1/4 may not be closed.

Switching function

As pressure rises:
1 NC opens, 2 NO closes.
As pressure falls:
1 NC closes, 2 NO opens.

Definition of switching difference Δp

The switching difference Δp is the pressure difference between the upper and lower switching pressures.

**GGW...A4, Design: Clear cover
Protection class: IP 54**

- IP 54**
- 5 Protection against ingress of solid particles $\varnothing \geq 1$ mm.
Protection against access to hazardous parts using $\varnothing \geq 1$ mm wire
Complete contact protection
 - 4 Protection against a water jet.
No hazardous conditions may result.

**GGW...A4/2, Design: Metal housing
Protection class: IP 65**

- IP 65**
- 6 Protection against the entry of dust (dust sealed).
Protection against access to hazardous parts using $\varnothing \geq 1$ mm wire
Complete contact protection
 - 5 Protection against a water jet from a nozzle directed at the unit (housing) from any directions
No hazardous conditions may result (water jet).

Technical specifications

Max. operating pressure	GGW 3 A4	- GGW 150 A4	0...500 mbar (50 kPa)		
	GGW 3 A4/2	- GGW 150 A4/2	0...500 mbar (50 kPa)		
	GGW 3 A4-U	- GGW 150 A4-U	0...-500 mbar (-50 kPa)		
	GGW 3 A4-U/2	- GGW 150 A4-U/2	0...-500 mbar (-50 kPa)		
Pressure connection	P+: In the center of the underside of the housing, G 1/4 internal thread in accord. with ISO 228: Gas or air . P+: On the side of the housing with closure screw, G 1/4: Gas or air P-: On the side of the underside of the housing, G 1/8 internal thread in accord. with ISO 228: Gas or air .				
Metering connection	Metering connection tube integrated into the metal housing, ø 9				
Temperature range	Ambient temperature	-15 °C to +70 °C			
	Medium temperature	-15 °C to +70 °C			
	Storage temperature	-30 °C to +80 °C			
Materials	GGW...A4				
	Housing base	aluminium die casting			
	Cover	Polycarbonate			
	Switch portion	Polycarbonate			
	Membrane	NBR			
	Switch contact	Ag gold-plated (Au)			
		suitable for DDC applications: 24 VDC; 0.01 A			
	GGW...A4/2				
	Housing base	aluminium die casting			
	Cover	Zinc diecast, powder-coated			
	Switch portion	Polycarbonate			
	Membrane	NBR			
	Switch contact	Ag gold-plated (Au)			
		suitable for DDC applications: 24 VDC; 0.01 A			
Switching voltage	DC	min. 5 V	max. 24 V		
	(AC eff.	min. 24 V	max. 250 V)		
	(DC	min. 24 V	max. 48 V)		
Nominal current	DC	20 mA			
	(AC eff.	10 A)			
Switching current	DC	min. 5 mA	max. 20 mA		
	(AC eff.	min. 20 mA	max. 6 A cos φ 1)		
	(AC eff.	min. 20 mA	max. 3 A cos φ 0,6)		
	(DC	min. 20 mA	max. 1 A)		
Electrical connection	Standard	at screw terminals via cable gland, M20 x 1,5			
	Special design	plug connection for line sockets as per DIN EN 175 301-803, 3-pin with protection contact			
Degree of protection	GGW...A4	IP 54 in accord. with IEC 529 (EN 60529), (clear cover).			
	GGW...A4/2	IP 65 in accord. with IEC 529 (EN 60529), (metal housing).			
Adjustment	With rising pressure and installed in a vertical position. Optional rising or dropping pressure adjustment on-site possible. Note switch point change if installation position changes.				
Adjustment tolerance	± 15% switch point deviation based on the setpoint and with unit installed in a vertical position. Optionally, rising (⬆) or falling (⬇) adjustment possible on site.				
Deviation	Permissible deviation of the set value ≤ ± 15 % in the service life test according to EN 1854

Installation position

Standard installation position

When installed horizontally, the pressure switch switches at a pressure higher by approx. 0.5 mbar (GGW...A4) or higher negative pressure (GGW...A4-U).

When installed horizontally overhead, the pressure switch switches at a pressure lower by approx. 0.5 mbar (GGW...A4) or lower negative pressure (GGW...A4-U).

When installed in an intermediate installation position, the pressure switch switches at pressure deviating from the set reference value by max. ± 0.5 mbar.

Designation

GGW 150 A4 [Au-M-MS9-V0-VS3]

Pressure connection

V0 Pressure connection G 1/4 position 0
V3 Pressure connection G 1/4 position 3

screw plug

VS0 screw plug at position 0
VS3 screw plug at position 3

Test nipple

MS3 Test nipple at position 3
MS9 Test nipple at position 9
M9 Test nipple, open position 9

Electrical connection

M M20 x 1.5 cable gland (standard)
G3 Device connector

Contact material

Au Gold plated silver

Adjustment ranges [mbar]

0,4 - 3
1 - 10
2,5 - 50
30 - 150

Pressure switch design

GGW A4 Clear cover PC, (IP54)
Differential pressure switches when the pressure exceeds or drops below the adjusted setpoint (positive pressure).

GGW A4/2 Metal housing powder-coated, (IP 65)
Differential pressure switches when the pressure exceeds or drops below the adjusted setpoint (positive pressure).

GGW A4-U Clear cover PC, (IP54)
Differential pressure switches when the pressure exceeds or drops below the adjusted setpoint (negative pressure).

GGW A4-U/2 Metal housing powder-coated, (IP 65)
Differential pressure switches when the pressure exceeds or drops below the adjusted setpoint (negative pressure).
