F.I.D.A. S.r.l.: A BRIEF PRESENTATION

F.I.D.A. S.r.l. produces high-tension ignition transformers from over 50 years. The main applications are: gas and oil burners, hydro cleaners and electric mosquito-killer. The whole range of our products is conforming to the European Low Tension directive (mark CE) and it is built according to the norm of product EN 61558. The models of wider diffusion are certified from VDE and UL.

Among the most important clients we can quote:

- **BURNERS:** Riello (I), Finterm SpA (Joannes) (I), Lamborghini SpA (I), Baltur SpA (I), MAN GmbH (D), Intecal GmbH (D), Electro-Oil GmbH (D), Giersch GmbH (D), Bentone AB (S)
- **HYDROCLEANERS - GENERATORS:** Alfred Kärcher GmbH (D), Portotecnica Div. Di IPC Spa (I), Comet SpA (I)
- **MOSQUITO-KILLER:** MO-EL (I), Electroinset (I), RST (P)

The F.I.D.A. transformers are very appreciated for their elevated reliability and for the advanced technology employed in their realization.

Thanks to the matured experience and the accurate laboratory searches, we have set an exclusive automatic method, on the basis of which the transformers, contained within special dice and places under high vacuum, contemporarily come impregnate and encapsulated with high isolation resin.

In this way we have succeeded in containing the ignition transformers in a unique insulating block, getting numerous and notable merits, as a very high electric isolation, safety and power of spark and greatest heat dissipation. Besides the COMPACT transformers include, incorporated in the insulating block, a magnetic screen for the reduction of the electromagnetic interferences.

F.I.D.A. is situated around 10 kms. far from Venice, in front of the "MOGLIANO VENETO" exit of the A27 highway.
