Product update

New release of RMG-RMO control box, now named CMG-CMO

Dear customer,

We are pleased to inform you that the RIELLO RMG (gas) and RMO (oil) control boxes (C-series) have been renamed in CMG and CMO (D-series).

The new naming had been introduced to easily identify the latest version of the control box, that has some adaptation of the production process.

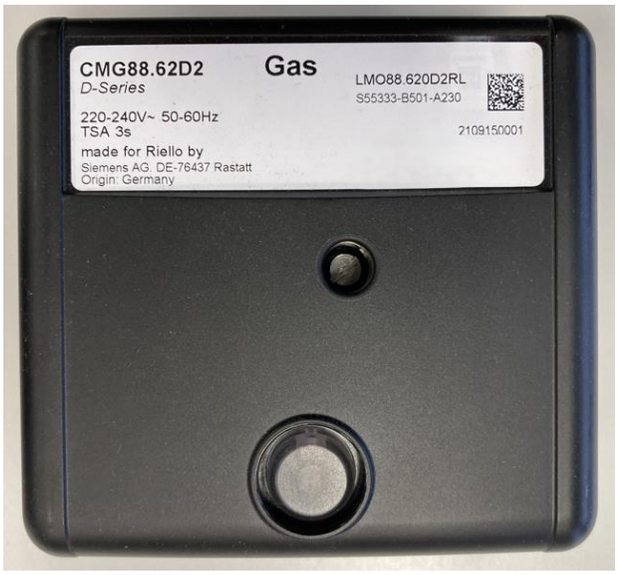

Due to some disruption of components supplying, it had been necessary to review the production process, but no differentiation on performance and quality had been introduced.

The new CMG-CMO replace the previous RMG-RMO and the two are identical as performance, layout and dimensions, so completely interchangeable.

The below pictures show the RMG control box compared with the CMG; from the comparison it's possible to recognize the differences which are the name, CMG instead of RMG, and the control-box series, D-series instead of C-series.

ПРОМЭЛЕКТРОНИКА / sales@prom-elec.com

The new CMG-CMO replace the previous RMG-RMO as spare part also; the following table shows the correspondence of old/new spare part.

Please note that to facilitate the supply flow, in certain cases the spare part code had been changed.

For the burners of PRESS series, the replacement of a RMO with a CMO also require the replacement of the flame sensor, by installing a Siemens QRB4 to replace the Photodiode.

ПРОМЭЛЕКТРОНИКА / sales@prom-elec.com

BURNER FAMILY	CURRENT SPARE PART		NEW SPARE PART		
	CODE	NAME	CODE	NAME	NOTES
RS - R40 - GAS (2 stage)	3013073	RMG88.62C2	3013073	CMG88.62D2	Spare part code doesn't change
RS - GAS (modulating)	3013362	RMG/M88.62C2	3013362	CMG/M88.62D2	Spare part code doesn't change
RL (1 stage / 2 stage)	3013071	RMO88.53C2	20183425	CMO88.53D2	New spare part code
PRESS (1 stage / 2 stage)	3013071	RMO88.53C2	20213738	CMO88.53D2	New spare part code (Includes CMO control box + Siemens QRB4 flame sensor and support to fix it to the burner structure)

Your Sales Area referent is at your disposal for any clarification or information you might need.
