

Changing the basic function causes all parameters to be reset to factory settings.

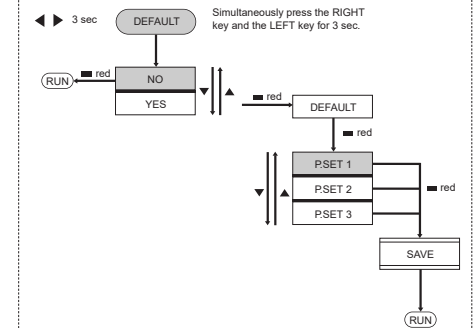

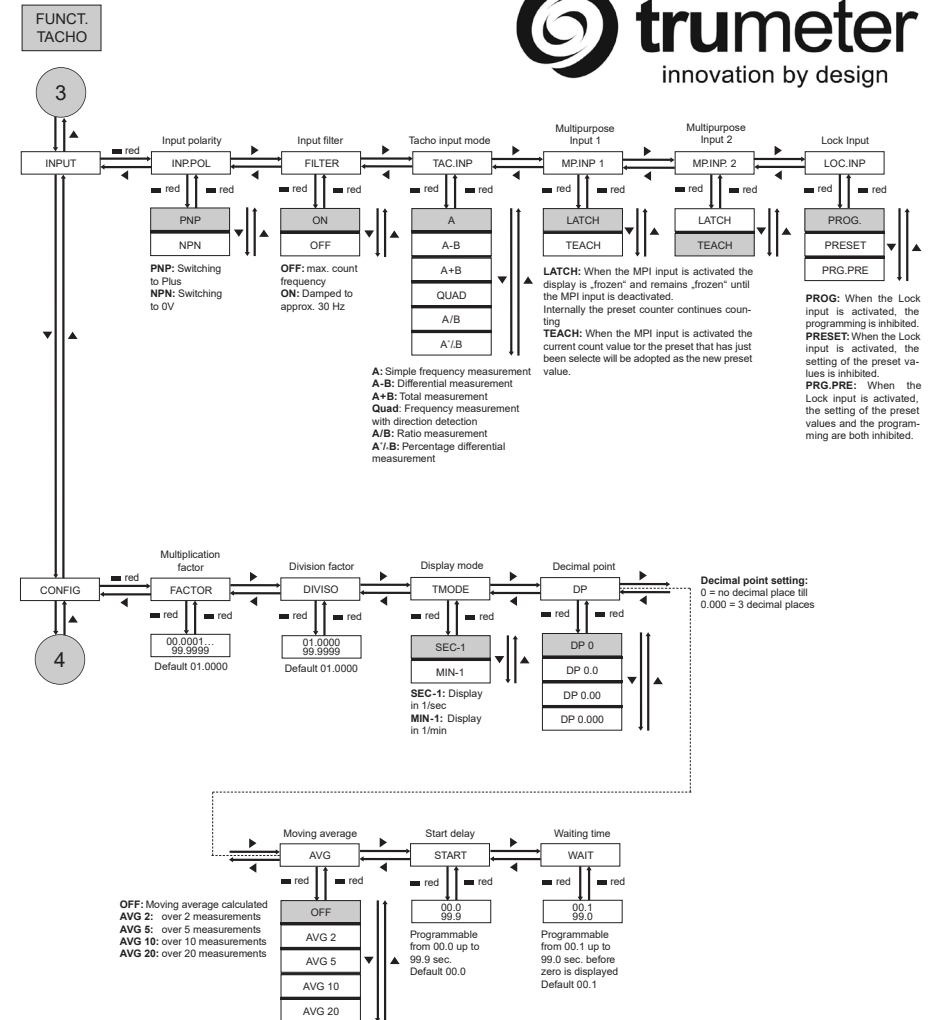

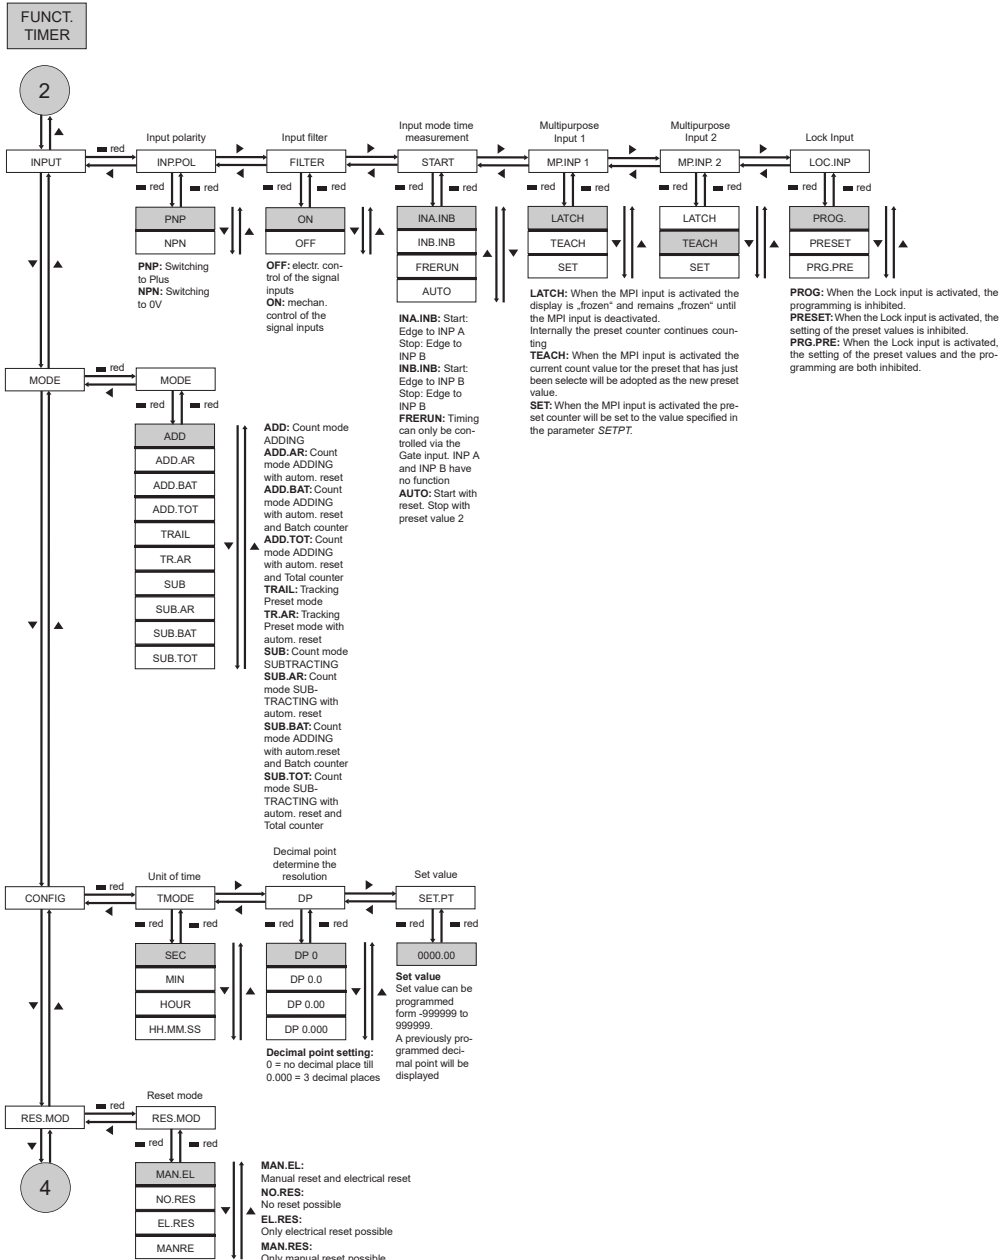

Switching the display during operation

Pressing the DOWN key or the UP key once causes the name of the currently selected display function to be displayed for 2 sec. If within this time the DOWN key or the UP key is pressed a second time, then the display switches to the next or previous display function. This is confirmed by displaying the new name for a period of 2 sec. After 2 sec the count value that corresponds to the selected display function is displayed.

ACTUAL	Auto	0.00.00	Main counter
BATCH	Auto	0	Batch counter (BATCH only if BATCH mode selected)
TOTAL	Auto	0.00.00	Total counter (TOTAL only if TOTAL mode selected)
PRES. 1	Auto	0.10.00	Preset 1
PRES. 2	Auto	0.20.00	Preset 2
