MOTORIZED ZONE VALVES / VALVOLA MOTORIZZATA DI ZONA / VALVULAS DE ZONA
MOTORIZADAS / ELEKTRISCH GEMOTORISEERDE AFSLUITCOMBINATIES / VANNES DE
ZONE MOTORISEES / STELLVENTILE MIT ELEKTRISCHEM ANTRIEB

INSTALLATION INSTRUCTIONS

Application GB

These two-position (open/closed) motorized zone valves are for use in small bore and mini-bore central heating installations to provide "zoned" space temperature control. Depending upon application they can be controlled by a room thermostat or by an aquastat.

Maximum Differential Pressure for Close-off: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

Maximum Static Pressure: 8.6 bar (860 kPa)

Maximum Ambient Temperature: 50° C

Maximum and Minimum Flow Temperatures: 5° C – 88° C (Special models available for chilled water applications).

Auxiliary Switch Rating (V4043H, V8043G): 2.2 A at 230 V ~ 50 Hz.

Applicazione I

Queste valvole motorizzate di zona a due posizioni (aperta/chiusa) sono state realizzate per l'impiego negli impianti di riscaldamento centralizzato per regolare la temperatura ambiente <<a zone>>. In funzione della loro applicazione, esse possono essere comandate da un termostato ambiente o da un aquastat.

Massima Pressione Differenziale in Chiusura: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

Massima Pressione Statica: 8.6 bar (860 kPa)

Massima Temperatura Ambiente: 50° C

Campo di Temperatura del Fluido: 5° C – 88° C (Sono disponibili modelli speciali per applicazioni con acqua refrigerata).

Portata Deio Contatti Ausiliari (V4043H, V8043G): 2,2 A 230 V ~ 50 Hz.

Aplicación E

Estas válvulas motorizadas de dos posiciones (abierta/cerrada) se emplean en instalaciones de calefacción central para controlar la temperatura independiente de una zona. Pueden ser controladas mediante un termostato de ambiente o un aquastat.

Presión Diferencial Máxima de Cierre: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

Presión Estática Máxima: 8.6 bar (860 kPa)

Temperatura Ambiente Máxima: 50° C

Temperaturas Máxima y Mínima del Fluido: 5° C – 88° C (Existen modelos especiales para aplicaciones de refrigeración).

Interruptor Auxiliar (V4043H, V8043G): 2,2 A 230 V ~ 50 Hz.

Toepassing NL

Deze elektrisch gemotoriseerde, tweestanden (open/dicht) zone-afsluiters zijn bestemd voor ruimte-temperatuurregeling per zone in verwarmingsinstallaties met kleine en zeer kleine leidingdiameters. Afhankelijk van de veriesten kunnen zij worden geregeld met een ruimte- of leidingthermostaat.

Maximaal Toelaatbaar Drukverschil over de Gesloten Afsluiter: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

Maximaal Toelaatbare Statische Druk: 8.6 bar (860 kPa)

Maximaal Toelaatbare Omgevingstemperatuur: 50° C

Toelaatbare Mediumtemperatuur: 5° C – 88° C (Speciale Uitvoeringen Verkrijgbaar Voor Koelwaterregeling).

Contactbelasting Hulpschakelaar (V4043H, V8043G): 2,2 A bij 230 V ~ 50 Hz.

Application F

Ces vannes motorisées sont utilisées, dans des installations de chauffage central avec conduit d'eau à faible diamètre, pour y réaliser un réglage de la température en tout ou rien par zone. Suivant l'application, elles seront commandées par un thermostat d'ambiance ou un <<aquastat>> (thermostat de chaudière).

Pression Différentielle Maximum D'utilisation: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

Pression Statistique Maximum: 8.6 bar (860 kPa)

Temperature D'ambiance Maximum: 50° C

Temperature Minimum et Maximum du Fluide: 5° C – 88° C
(Modeles disponibles pour systemes de refroidissement).

Pouvoir de Coupure du Contact Auxiliaire (V4043H, V8043G): 2.2 A, 230 V ~ 50 Hz.

Verwendung D

Diese Stellventile (auf/zu) mit elektrischem Antrieb sind für Zentralheizungsanlagen mit kleinen Rohrdurchmessern für Zonentemperaturregelungen vorgesehen. Sie werden durch Raumtemperaturregler oder Tauchtemperaturregler gesteuert.

Maximaler Schließdruck: 1" – 0.45 bar (45 kPa); 3/4" – 0.55 bar (55 kPa); 1/2" – 1.35 bar (135 kPa).

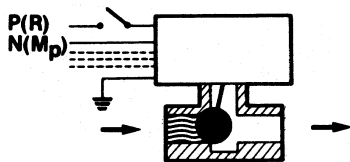

Maximaler Statischer Druck: 8.6 bar (860 kPa)

Maximale Umgebungstemperatur: 50° C

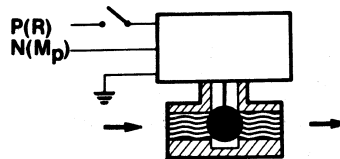

Temperaturgrenzen des Durchfließenden Wassers: 5° C bis 88° C
(Spezialausführungen für Betrieb mit Kühlwasser).

Schaltvermögen des eingebauten Hilfsschalters (V4043H, V8043G): 2.2 A, 230 V ~ 50 Hz.

INSTALLING / INSTALLAZIONE / INSTALACIÓN / INSTALLATIE / INSTALLATION / EINBAU

GB When filling, venting, or draining the system place the AUTO/MAN lever in the MAN position at the NC valves V4043C, H and V8043G. The NO valves V4043B and V8043B are not equipped with the manual lever.

I Quando si riempie, si ventila o si svuota il sistema, posizionare la leva AUTO/MAN nella posizione Manuale (MAN) nelle valvole NC V4043C, H e V8043G. Le valvole NO V4043B e V8043B non sono equipaggiate di leva manuale.

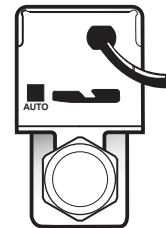

E Durante el llenado, purga o vaciado del sistema, situar la palanca AUTO/MAN en la posición MAN en las válvulas NC V4043C, H y V8043G. Las válvulas NA V4043B y V8043B no están equipadas con la palanca manual.

NL Plaats de handbedieningshendel in de stand MAN tijdens het vullen, ontluften of aftappen van de installatie bij de NC-kleppen V4043C, H en V8043G. De NO-kleppen V4043B en V8043B zijn niet uitgerust met de handbediende hendel.

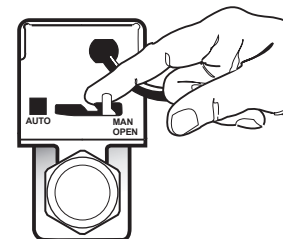

F Lors du remplissage, de la mise à l'air libre ou de la vidange du système, placez le levier AUTO/MAN en position MAN sur les vannes NC V4043C, H et V8043G. Les vannes NO V4043B et V8043B ne sont pas équipées de levier manuel.

D Beim Füllen, Entlüften und Ablassen ist der Schalthebel AUTO/MAN auf MAN (Einstellung von Hand) zu stellen bei den stromlos geschlossenen Ventilen V4043C, H und V8043G. Die stromlos offenen Ventile V4043B und V8043B sind nicht mit dem Handhebel ausgestattet.
