

RS 68÷1200/E-/EV O₂ Series (O₂ Control Ready)

Monoblock Low NO_x Gas Burners
Modulating with LMV52 Electronic Cam

Product Overview

O₂ Control Technology

The traditional combustion system aimed at the supply, dosage and correct mixing of the elements necessary for the combustion, obtained by means of mechanical devices, has deeply evolved thanks to the integration with electronic control elements. The state-of-the-art high-tech combustion systems allow the direct control of the combustion products and, through the detected oxygen content, actively act in order to maintain the combustion performances at optimal levels.

The burners equipped with combustion control systems have been initially supplied for the most complex and sophisticated plants, generally with high power applications, while they are now finding a greater and wider diffusion thanks to a growing sensitivity towards energy saving and the reduction of air polluting elements.

Thanks to the advanced combustion control systems equipped on RS/E-EV O₂ Riello burners, the combustion performances are monitored and maintained over time; energy savings and reduction of the air pollution are the primary targets. Moreover, these advanced systems are very flexible as they can be applied to various combustion systems, both within civil and industrial applications; furthermore, this burner series is suitable for the installation in existing installations, resulting in a considerable improvement and modernization of the system. Riello burners represent the ideal solution to fulfill any legislative obligations while simultaneously optimizing the efficiency of the combustion system.

Monoblock Low NO_x Gas Burners RS 68÷1200/E – /EV O₂ Series (O₂ Control Ready)

With many years of experience in the design and manufacture of burners, Riello has developed a new range of Commercial and Industrial products, the new RS 68÷1200/E-EV O₂ Series, capable to constantly optimize the combustion parameters based on the residual O₂ content in the exhaust fumes, while achieving Low NO_x emission performances.

The RS 68÷1200/E-EV O₂ Series burner series operation is based on a Digital Burner Management System, which is able to manage the air-fuel ratio by independent servomotors in order to obtain a perfect output control and to assure a correct low polluting combustion and a safe operation on all modulation range. The philosophy of the combustion regulation based on the feedback of the O₂ probe is the continuous search for the optimal working point of the burner, which is maintained through constant surveillance.

High performance over time and reduced polluting emissions can thus be obtained by acting against the 'disturbing factors' which inevitably influence the composition of the comburent air / fuel mixture over time, such as, for example, changes in temperature and pressure of air and fuel, variation in the LCV of the fuel, variation of the pressure in the combustion chamber, mechanical hysteresis.

Finally, the monoblock configuration allows having all the components integrated in a compact size, in order to facilitate and make extremely easy the installation and maintenance.

Burner with O₂ control: functional diagram

Specification

State of supply

Monoblock forced draught, Low NOx gas burner, with modulating operation, fully automatic, made up of:

- High performance fan with low sound emissions
- Air suction circuit
- Air damper for air setting controlled by a high precision servomotor
- Air pressure switch
- Three-phase Fan starting motor
- Low emission combustion head, that can be set on the basis of required output, fitted with:
 - stainless steel end cone, resistant to corrosion and high temperatures
 - flame stability disk
- Automatic regulator for gas delivery, controlled by a high precision servomotor
- Maximum gas pressure switch, with pressure test point, to stop the burner in the case of excess pressure on the fuel supply line
- Electronic Cam control (LMV 52)
 - for air/fuel setting
 - for output modulation with incorporated PID control of temperature or pressure of the heat generator
 - with indication of operating status and parameters, error messages and diagnosis of fault causes
 - compatible with combustion control based on the residual O₂ content in the exhaust fumes (O₂ probe and O₂ analyzer available as a separate kit)
- Operator panel with LCD Display Interface, for combustion system commissioning and monitoring
- Burner safety control included on Electronic Cam device
- Ionization probe or IR flame detector, depending on the burner model
- Main electrical supply terminal board
- Burner on/off switch
- Manual or automatic output increase/decrease switch
- Contacts motor and thermal relay with release button
- Motor internal thermal protection
- Clean contacts relay
- Burner failure led signal and lighted release button
- Lifting rings

Standard equipment:

Thermal insulation screen

- Screws to fix the burner flange to the boiler
- Screws to fix the gas train flange
- Gasket for gas train flange
- Spare parts catalogue
- Instruction handbook for installation, use and maintenance

Burner accessories

Oxygen Control kit (QGO₂)

The QGO₂ is an oxygen analyzer with relevant probe which controls and supervises the residual oxygen content in exhaust gases.

Variable Speed Drive (VSD) for RS/EV series only

The motor speed variation for the RS/EV BLU burners series is obtained thanks to a frequency converter: variable speed drive (VSD), provided with a programming panel with start-up assistant. It always must be ordered with RS/EV series.

► RS 68 - 120 - 160 - 200/E-/EV O ₂ BLU	3010388
► RS 310 - 410 - 510 - 610 - 810/E-/EV O ₂ BLU	
► RS 1000 - 1200/E-/EV O ₂ BLU	

Accessories for modulating operation

The control box of RS /E-/EV O₂ Burners includes the three point PID regulator to obtain the modulating operation.
The relative temperature or pressure probes fitted to the regulator must be chosen on the basis of the application.

BURNER	PROBE TYPE	RANGE (°C) (bar)	PROBE CODE
► All models	Temperature PT 100	-100 ÷ 500°C	3010110
	Pressure 4 ÷ 20 mA	0 ÷ 2,5 bar	3010213
	Pressure 4 ÷ 20 mA	0 ÷ 16 bar	3010214
	Pressure 4 ÷ 20 mA	0 ÷ 25 bar	3090873

Extended head kit

"Standard head" burners can be transformed into "extended head" versions, by using the special kit. The KITS available for the various burners, giving the original and the extended lengths, are listed below.

BURNER	STANDARD HEAD LENGTH (mm)	EXTENDED HEAD LENGTH (mm)	KIT CODE
► RS 68/E-EV O ₂ BLU	390	390	3010177
► RS 120/E-EV O ₂ BLU	390	390	3010177
► RS 160/E-EV O ₂ BLU	373	503	3010442
► RS 200/E-EV O ₂ BLU	373	503	3010474

DN80 gas flange kit

To modify the standard 2" burner gas input connection in to DN80 connection, a specific gas flange is available.

BURNER	KIT CODE
► RS 68 - 120 - 160 - 200/E-/EV O ₂ BLU	3010439

Infrared Flame Detector (IFD)

Some models of RS/E-EV BLU series, equipped with LMV51 or LMV52 control, can be equipped with infrared flame detector.

BURNER	KIT CODE
► RS 310-410-510-610-810/E-EV BLU	20181871

Riello Burners a world of experience in every burner we sell.

Across the world, Riello sets the standard in reliable and high efficiency burner technology.

With burner capacity from 5 kW to 48 MW, Riello gas, oil, dual fuel and Low NOx burners deliver unbeatable performance across the full range of residential and commercial heating applications, as well as in industrial processes.

With headquarter in Legnago, Italy, Riello has been manufacturing premium quality burners for over 90 year. The manufacturing plant is equipped with the most innovative systems of assembling lines and modern manufacturing cells for a quick and flexible response to the market.

Besides, the Riello Combustion Research Centre, located in Angiari, Italy, represents one of the most modern facility in Europe and one of the most advanced in the world for the development of the combustion technology.

Today, the company's presence on worldwide markets is distinguished by a well-constructed and efficient sales network, alongside many important Training Centres located in various countries to meet its customers' needs. Riello has 13 operational branches abroad (in Europe, America and Asia), with customers in over 60 countries.
