

ACVATIX™

2- and 3-port valves with flanged connections, PN 10

VVF32.., VXF32..

VVF32..

VXF32..

From the large-stroke valve line

- Control valves for medium temperatures from -10...150 °C
- Valve body of grey cast iron EN-GJL-250
- DN 15...150
- k_{vs} 1.6...400 m³/h
- Flange type 21, Flange design B
- Equipable with electromotoric actuators SAX.., SAV.. or electrohydraulic actuators SKD.., SKB.., SKC..

Use

In boiler, district heating and refrigeration plants, heating groups, ventilation and air-handling units as control or shutoff valves.

For use in closed circuits.

¹⁾ Suitable for medium temperatures up to 130 °C.

²⁾ Valve characteristic for k_{vs} value 100 m³/h from 70% stroke, k_{vs} value 160 m³/h from 85% stroke, and k_{vs} value 400 m³/h from 90 % stroke is optimized for maximum volumetric flow.

DN = Nominal size

k_{vs} = Flow nominal value of cold water (5...30 °C) through the fully opened valve (H_{100}) at a differential pressure of 100 kPa (1 bar)

S_v = Rangeability

Δp_s = Maximum permissible differential pressure at which the motorized valve still closes securely against the pressure

Δp_{max} = Maximum permissible differential pressure across the valve's throughport for the entire positioning range of the motorized valve

Ordering (Example)

Type	Stock no.	Description
VXF32.15-1.6	S55202-V113	3-port valve with flange, PN 10
SKD32.50	SKD32.50	Electrohydraulic actuator

Delivery

Valves, actuators and accessories are packed and delivered as separate items.

Note

Counter-flanges, bolts and gaskets must be provided on site.

Equipment combinations

Product documentation

Title	Content	Document ID
Mounting instructions valves VVF.. VXF..	Mounting instructions	M4030 74 319 0749 0
Valves VVF..,VXF..,VVG41.., VVG41.., VVG41.., VVG41.., VVG41..	Basic documentation: Contains background information and general technical basics for valves	P4030

Technical and mechanical design

The illustrations below show the basic design of the valves. Constructional features, such as the shape of plugs, may differ.

2-port valves

Note

2-port valves do not become 3-port valves by removing the blank flange!

3-port valves

Sizing

Flow chart

$\Delta p_{\max}$ values apply for the mixing function. $\Delta p_{\max}$ values for the diverting function, see table Type summary [► 2]

Valve characteristics

2-port valves

0...30 %: Linear

30...100 %: Equal percentage

$\eta_{gl} = 3$ to VDI / VDE 2173

For high k_{vS} values the valve characteristic is optimized for maximum volumetric flow k_{V100} .

For product lines:
VVF32.125-250
VVF32.150-400

0...100 %: Linear

3-port valves

Throughport A-AB

0...30 %: Linear

30...100 %: Equal percentage

$\eta_{gl} = 3$ to VDI / VDE 2173

For high k_{vS} values the valve characteristic is optimized for maximum volumetric flow k_{V100} .

Bypass B-AB

0...100 %: Linear

Port AB = constant flow

Port A = variable flow

Port B = bypass (variable flow)

Mixing: Flow from port A and port B to port AB

Diverting: Flow from port AB to port A and port B

For product lines:
VXF32.125-250
VXF32.150-400

Throughport A-AB

0...100%: Linear

Bypass B-AB

0...100%: Linear

Operating pressure and medium temperature

Fluids, PN10
with V..F32..

— — — Curve for saturated steam; steam forms below this line

— . . . Operating pressure according to EN 1092, valid for 2-port valves with blank flange

Operating pressure and operating temperatures according to ISO 7005, EN 1092 and EN 12284

Note

All relevant local directives must be observed

Medium compatibility and temperature ranges

Medium	Temperature range		Type	Notes
	T _{min}	T _{max}	V..F32..	
	[°C]			
Cold water	1	25	x	-
Low-temperature hot water	1	130	x	-
High-temperature hot water ¹⁾	130	150	x	-
Water with antifreeze	-5	150	x	For medium temperatures below 0°C, the stem heating ASZ6.6 has to be installed.
	-10	150	x	
	-20	150	-	
Brines	-5	150	x	For medium temperatures below 0°C, the stem heating ASZ6.6 has to be installed.
	-10	150	x	
	-20	150	-	
Demineralized water according to VDI2035 / SWKI_BT102-01	1	150	x	-

¹⁾ Differentiation due to saturated steam curve

Fields of use

Fields of use		Type	
		VVF32..	VXF32..
Generation	Boiler plants	x	x
	District heating plants	x	-
	Refrigeration plants	x	x
Distribution	Heating groups	x	x
	Ventilation and air-handling units	x	x

 CAUTION	
	National safety regulations Failure to comply with national safety regulations may result in personal injury and property damage. Observe national provisions and comply with the appropriate safety regulations.

Engineering

Mounting location

Preferably mount the valves at the return, as the temperature is lower there and the strain on the stem sealing gland is lower.

Dirt trap

Mount a dirt filter or dirt trap before the valve to ensure the proper functioning and long service life of the valve. Remove dirt, welding beads, etc. from the valves and pipes.

Cavitation

Cavitation can be avoided by limiting the pressure differential across the valve depending on the medium temperature and prepressure.

Mounting

Mounting positions

Mounting positions apply to both 2- and 3-port valves.

Commissioning

The valve may be put into operation only if actuator and valve are correctly assembled.

Note

Ensure that the actuator stem and valve stem are rigidly connected in all positions.

Function check

Valve	Throughport A->AB	Bypass B->AB
Valve stem extends	Closes	Opens
Valve stem retracts	Opens	Closes

Maintenance

The valves are equipped with maintenance-free, continuously lubricated stem sealing glands. See Accessories / Spare parts [► 5] for replacement stem sealing glands.

CAUTION

When servicing valves or actuators:

- Deactivate the pump and turn off the power supply.
 - Close the shutoff valves.
 - Fully reduce the pressure in the piping system and allow pipes to completely cool down.
- If necessary, disconnect the electrical wires.

Disposal

Do not dispose of the valve as part of domestic waste.

- Special treatment for individual components may be required by law or make ecological sense.
- Comply with all local and currently applicable laws and regulations.

Warranty

The application-related technical data listed in the chapters Type summary [► 2] and Equipment combinations [► 4] are guaranteed only when the valves are used in connection with the Siemens actuators listed. When used with actuators of other manufacture, any warranty by Siemens becomes void.
