Description: Sinamics Drive Series

Manufacturer Name: Siemens AG, DF MC R&D

Manufacturer Address: Frauenauracher Straße 80, 91056 Erlangen, Germany

Test Date and Location: 14-30 May 2019, 13 Varey Road, Congleton CW12 1PH, UK

Tested configuration: Normal drive operation and load configuration.

Pass/Fail criteria: The SINAMICS G120XA Frame A to C has not undergone any modifications and has the same hardware as the equivalent SINAMICS G120X Frame Size A-F. Therefore, it provides the same Voltage Sag Immunity. The SINAMICS G120X Frame Size A-F was tested under SEMI F47 at full rated output power and continuous drive and motor operation during all voltage sags if automatic restart mode is enabled.

Certification:

Power Standards Laboratory certifies that the above tool meets the requirements of SEMI F47-0706 for voltage sag immunity when tested according to the procedures set forth in IEC 61000-4-34. An approved Voltage Sag Generator was used for the testing that fully complies with IEC 61000-4-34.

Recommendations:

The Sinamics G120X FSA-F Drive Series, as described in the MLFB Appendix of this test report, functions properly during all required voltage sags as outlined in SEMI F47-0706. No further recommendations are necessary.

Conclusions:

The Sinamics G120X FSA-F Drive Series and SINAMICS G120XA Frame A - C drives, as described in the MLFB Appendix of this test report, passes all required voltage sags based on SEMI F47-0706. The drives either maintain their output current level or they perform an automatic re-start after a voltage sag and continue to operate properly thereafter.
